

MSU Dorms Final Project Pre-Production

I had an idea when thinking of what to do for this project. Why is there not a website that students at Michigan State can use to easily learn about each dorm on campus? There are individual pages for each dorm on MSU's liveon website, but it can be annoying to navigate. So, I decided that I am going to create a single page website that uses supabase to obtain information for each dorm. I will also use supabase to obtain information about how far each dorm is from popular locations on campus such as Spartan Stadium, Breslin Center, etc. The site will change each time a button is clicked displaying a new dorm with the correct information. I will use Tailwind CSS to design the site and have some sort of form submission to supabase and will deploy everything using Netlify.

Comp Design of Final Idea

MSU Dorms

Landon Hall

Address: 632 W. Circle Drive East Lansing, MI 48825
Neighborhood: North
Floors: 3
Dining Hall?: Yes

Distance (Walking):
Spartan Stadium: 6 Minutes
Breslin Center: 14 Minutes
Library: 5 Minutes
